Financial Details

Cost to install: Please provide a detailed breakdown of Dark Fiber construction and installation costs. If an IRU is proposed, include one-time and recurring (maintenance) costs. Explain the proposed use of any existing infrastructure (e.g. fiber, conduits, telephone poles), and describe the new infrastructure to be built. Include the maximum time to complete installation, testing, and delivery of the complete system from the date of contract execution.

Cost to maintain: Please provide a detailed breakdown of annual recurring maintenance costs. This should include monitoring. Options to prepay future maintenance costs to eliminate or offset future maintenance payments are preferred.

Potential installation and maintenance costs not included in base contract: Please provide a detailed breakdown of the cost to install a mid-span spice lateral accessing two fibers in the main path of the dark fiber infrastructure. The lateral should be 100 ft. in length. Test results should be provided as described earlier in the RFP.
